

Processing Record for this file:
(Make notes here unique for this file)

Loading 2015-01-01 - 2015-02-01
Data loaded from detarred, unzipped files from the DMF

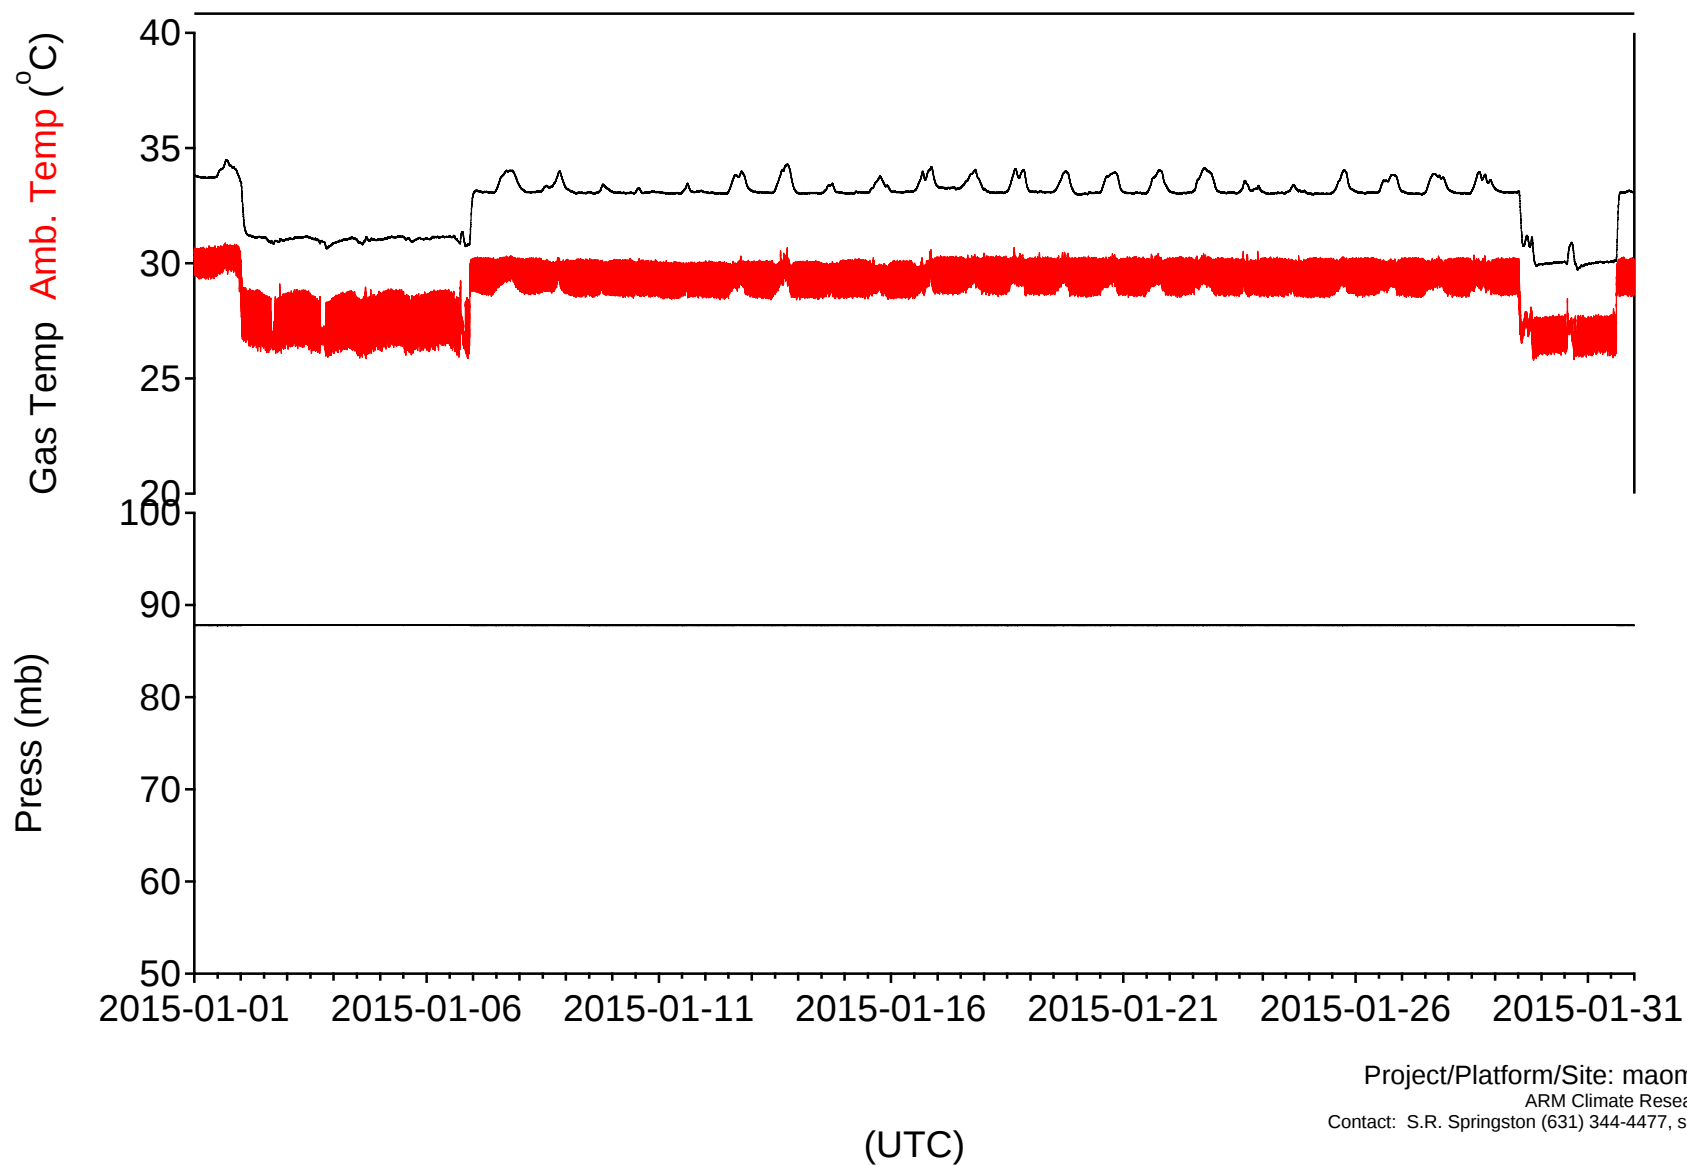

Processed CO data normally.
Ambient CO data appear normal and acceptable.

Standard additions show minimal variation over the month. On 2015-01-19, the SA response decreased 2-4% for unknown reasons (flow in manifold change?).
