

Processing Record for this file:
(Make notes here unique for this file)

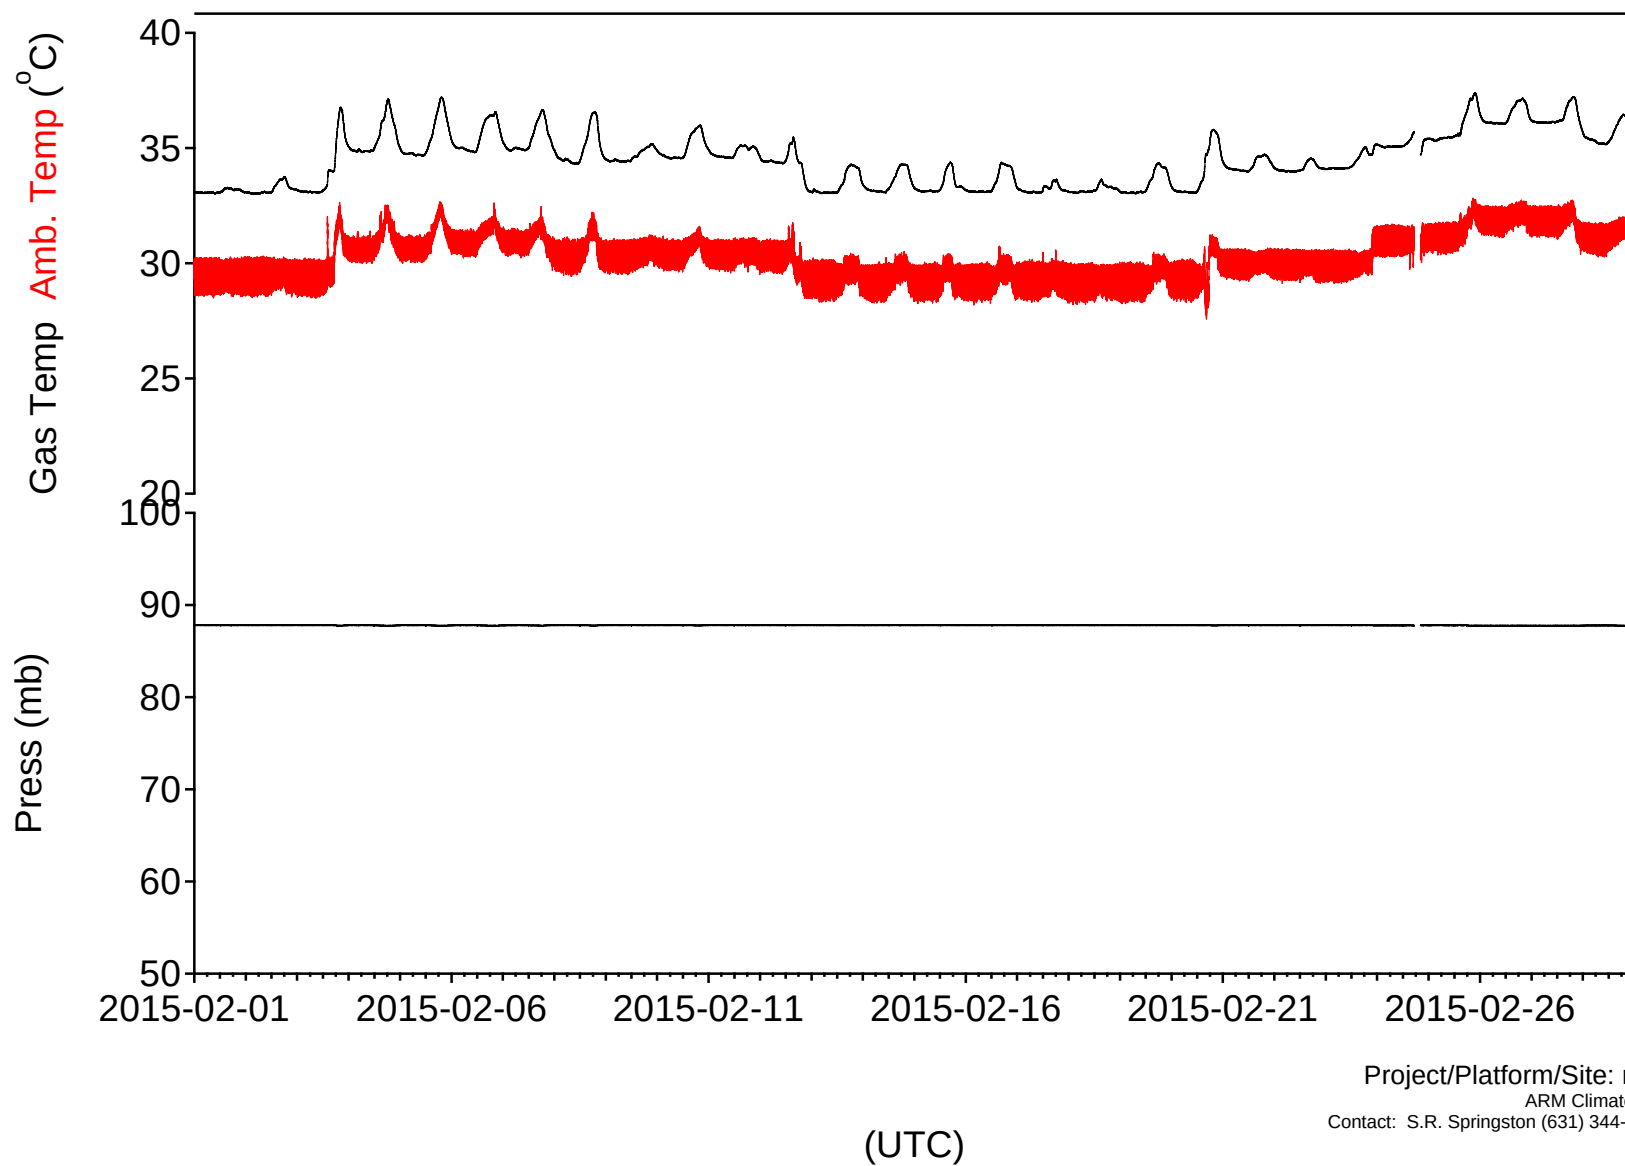

Loading 2015-02-01 - 2015-03-01
Data loaded from detarred, unzipped files from the DMF

Processed CO data normally.
Ambient CO data appear normal and acceptable.

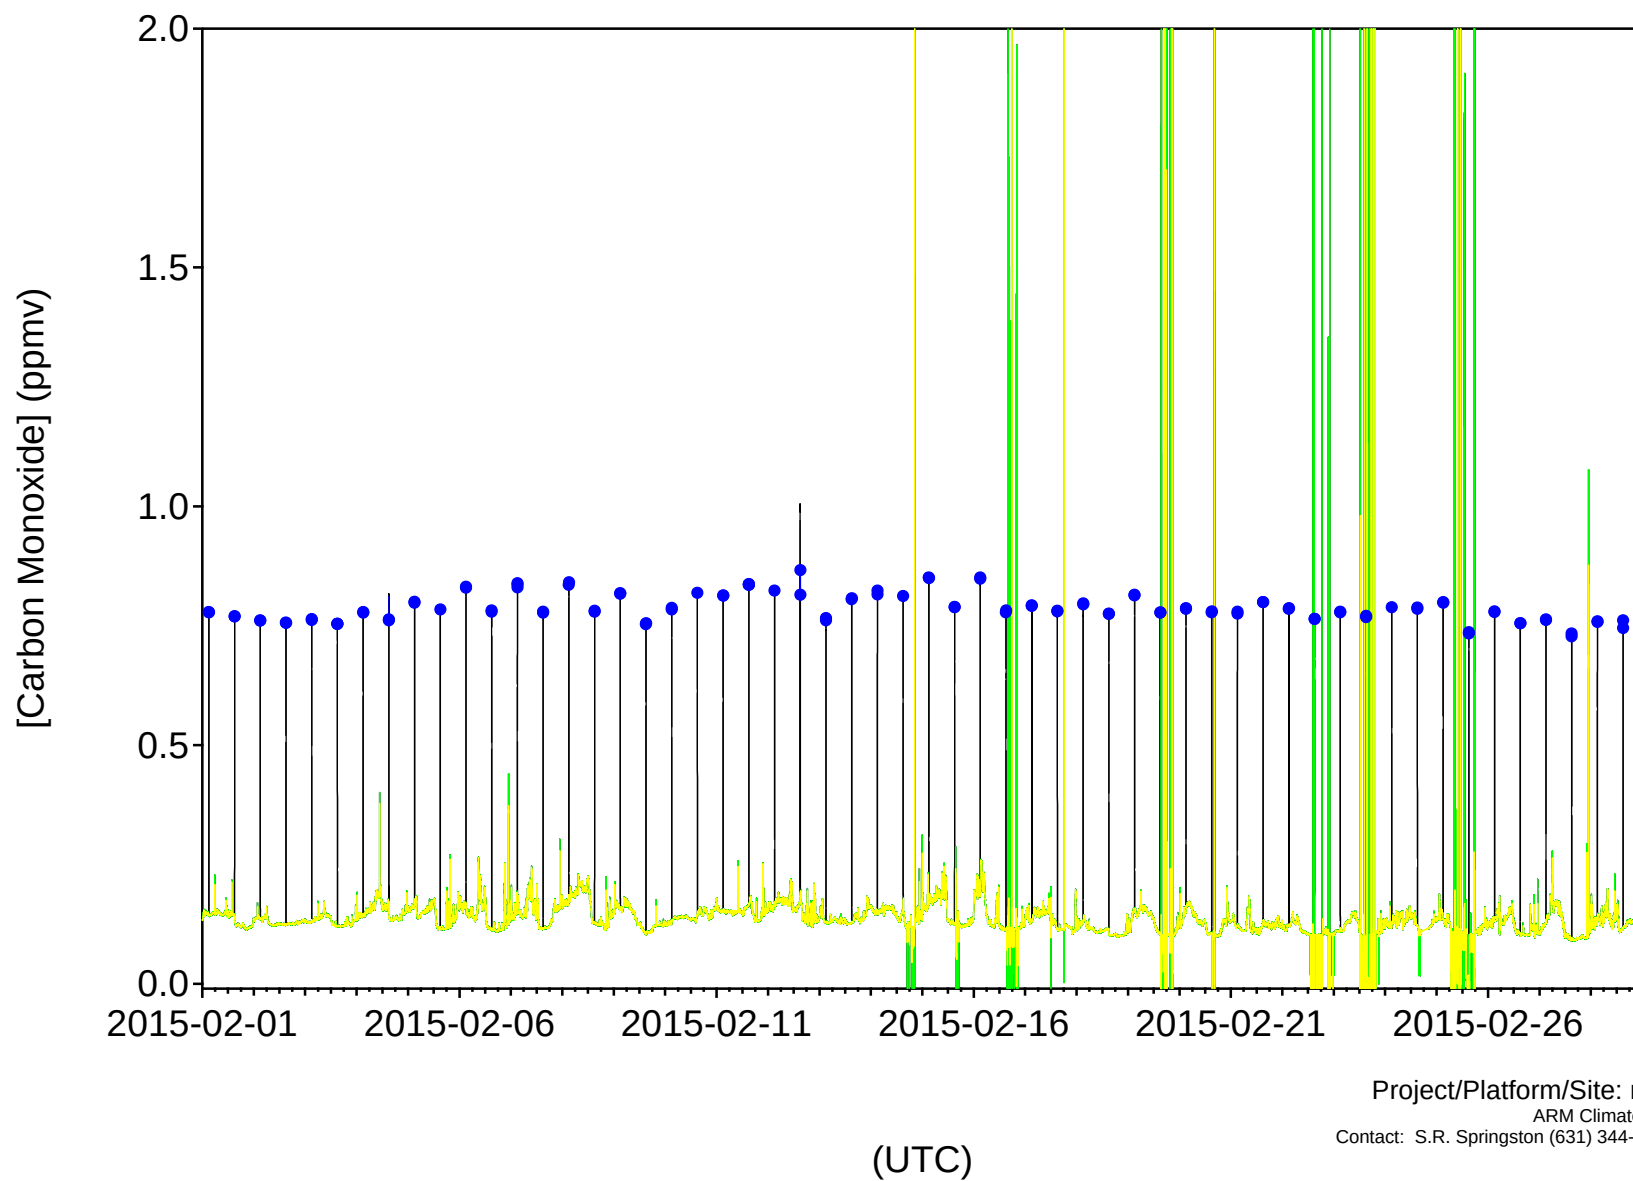

Standard additions show minimal variation over the month. Standard add nominal response very close (<4-5%) to nominal.

2015-02-14 16:58, 2015-02-25 18:00 DQR D150327.13 Multiple dropouts of ~1- 3 s where instrument appears to lose laser lock. These result in -1 and >2 ppmv on the output and were edited out.
