

Processing Record for this file:
(Make notes here unique for this file)

Loading 1/1/2014 - 2/1/2014

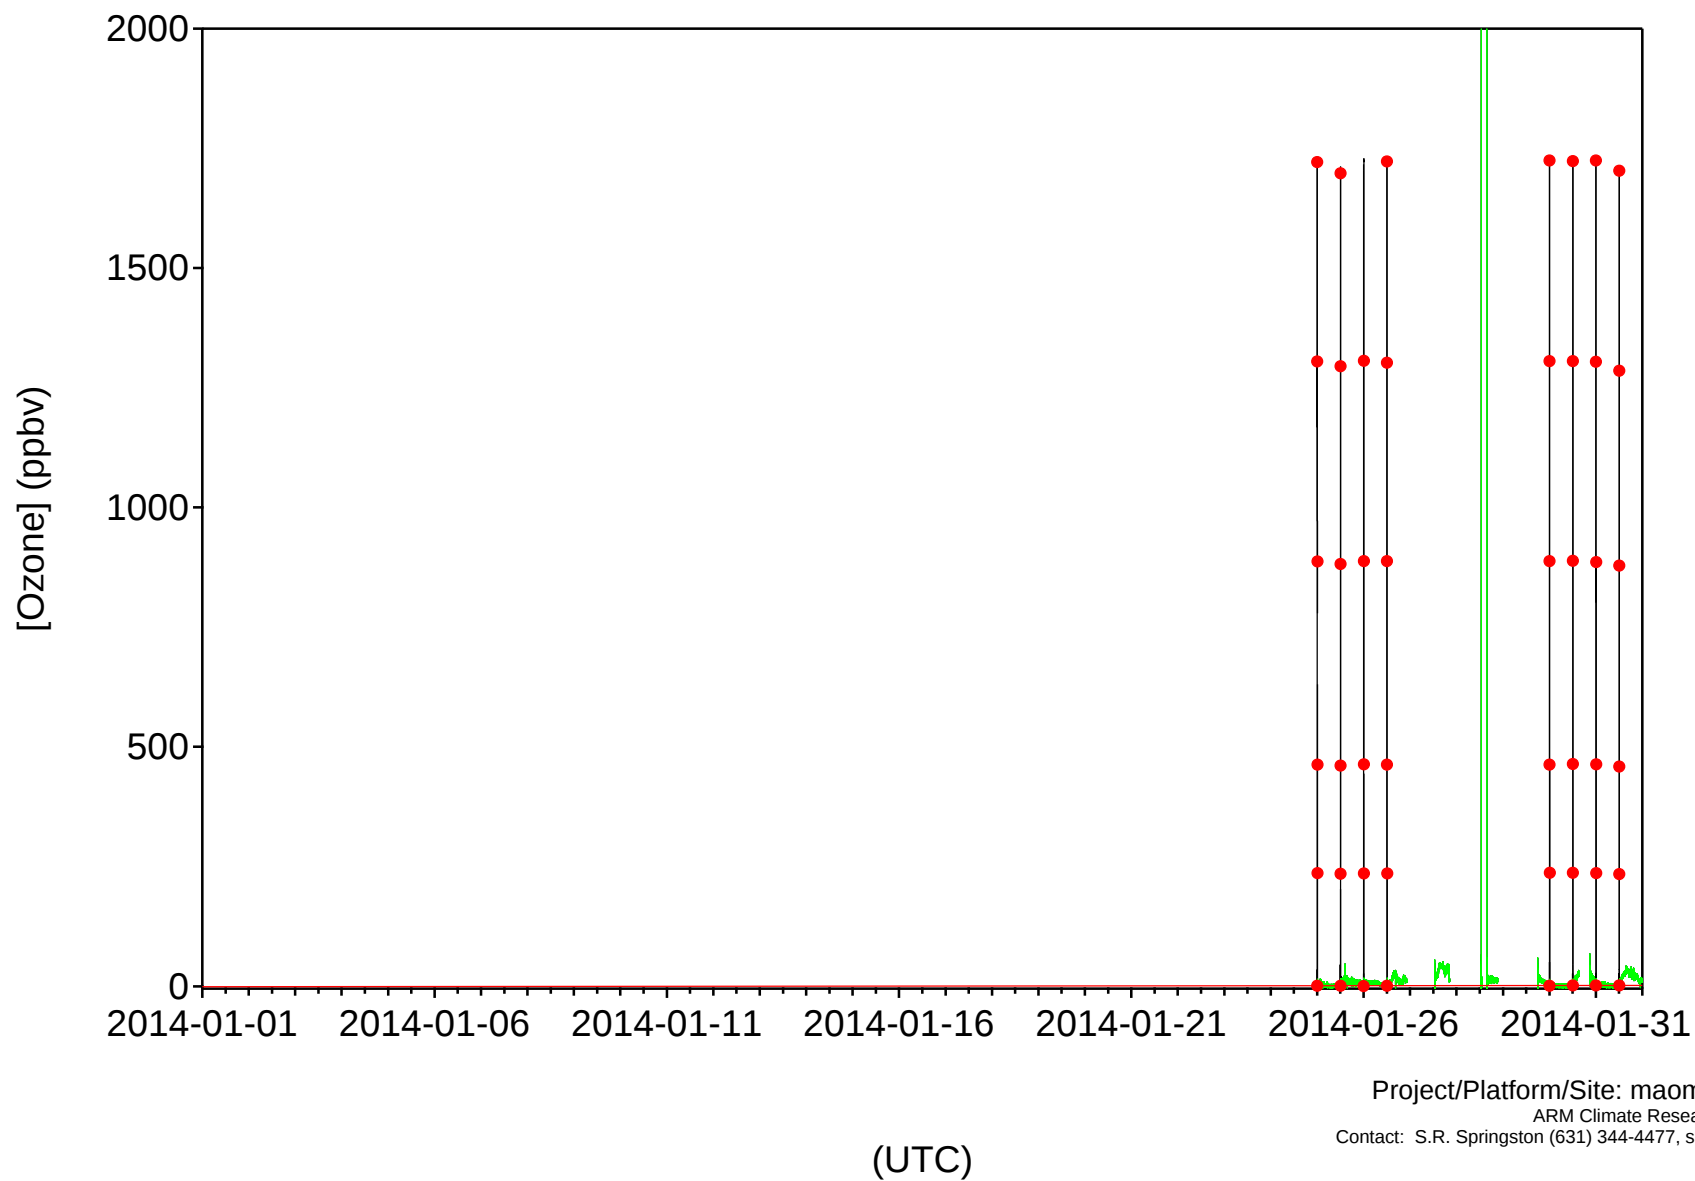

Data loaded from detarred, unzipped files from the DMF

Data appear normal and reliable. Internal calibrations consistent and very stable.

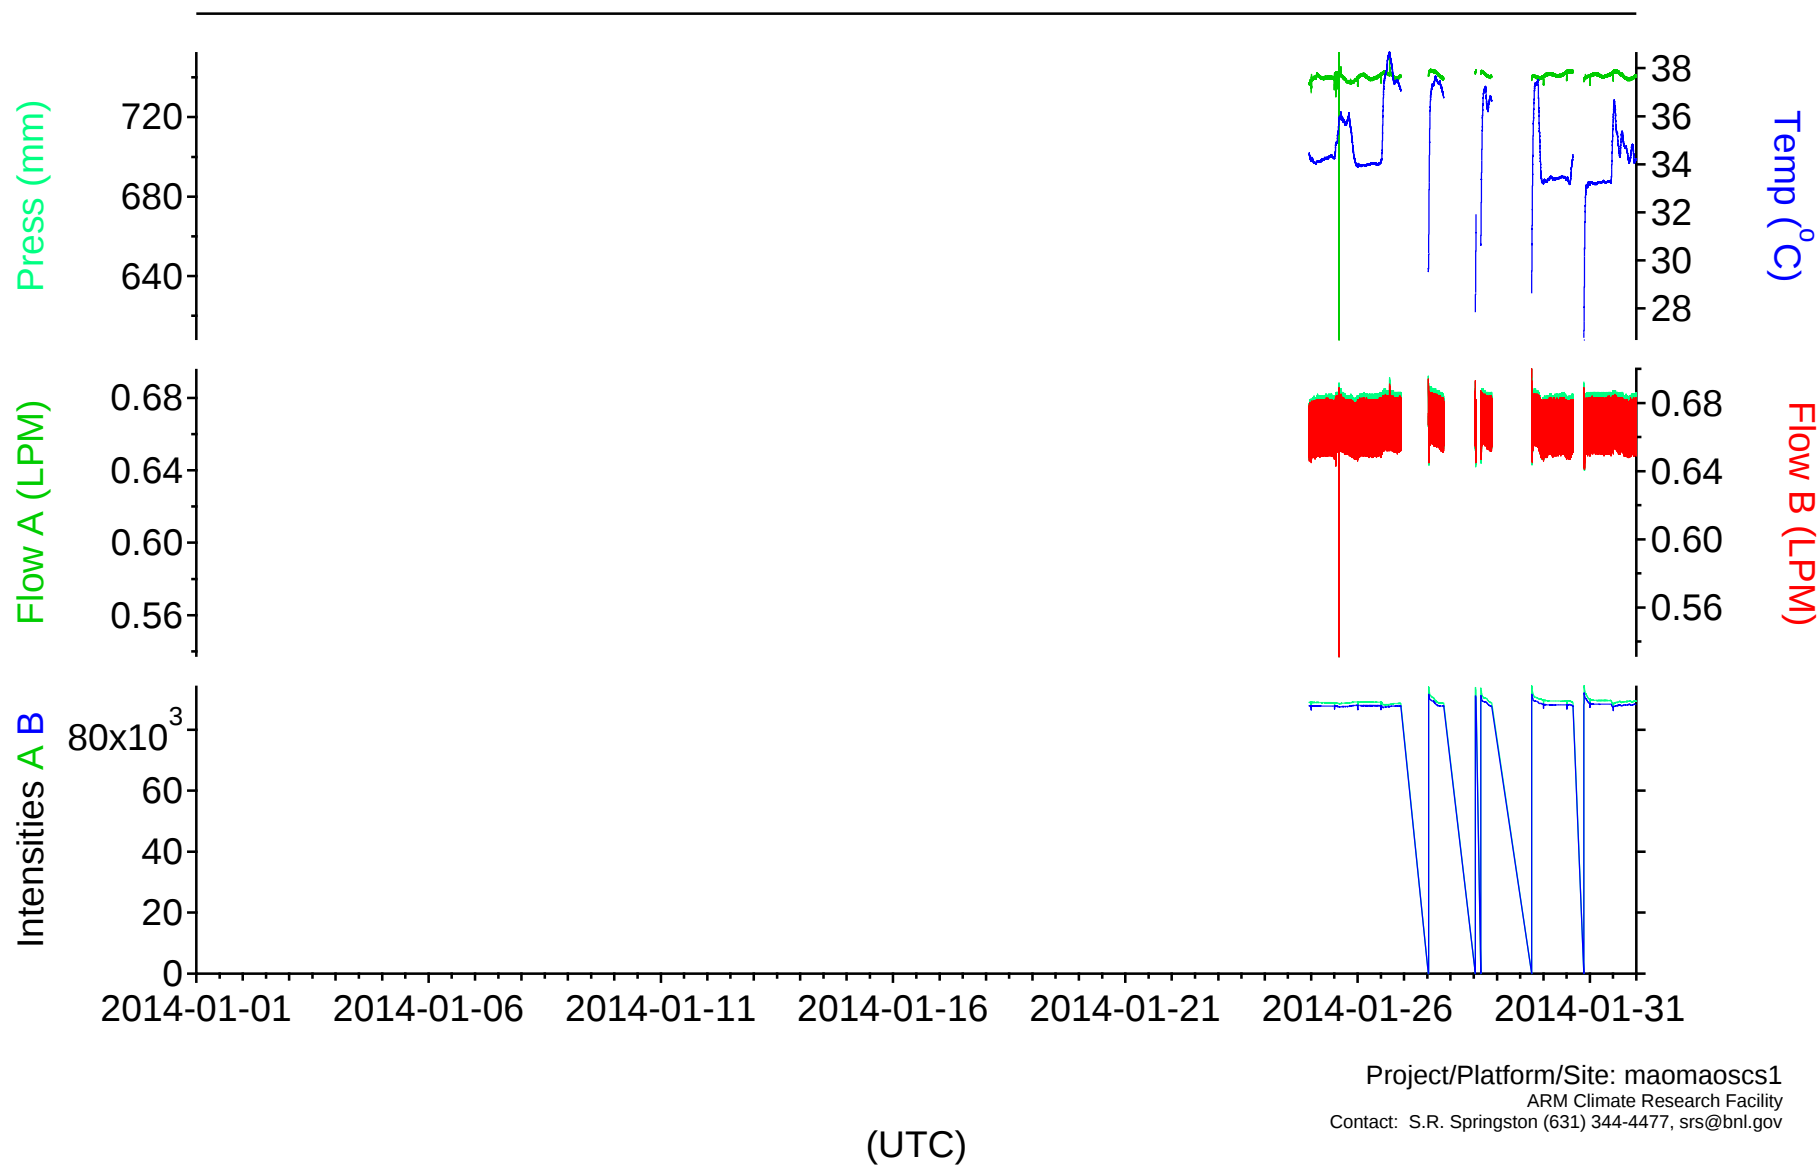

The instrument commenced GoAmazon operations on 2014-01-24 23:00 Data stability and valid ambient data commenced on 2014-01-29 18:39

Consult Operator logs for power outage periods. After power outages, the instrument 'rings' for ~5 minutes during warm up. These periods were edited out by Mentor.
