Interactions Between Biosphere, Atmosphere and Human Land Use in the Amazon Basin

Series: Ecological Studies, Vol. 227

- ▶ Provides the knowledge required for informed decisions on land use and development in Amazonia
- ▶ Offers perspectives for future research
- ▶ Richly illustrated throughout

This book offers a panorama of recent scientific achievements produced through the framework of the Large-Scale Biosphere-Atmosphere programme (LBA) and other research programmes in the Brazilian Amazon. The content is highly interdisciplinary, with an overarching aim to contribute to the understanding of the dynamic biophysical and societal/socio-economic structure and functioning of Amazonia as a regional entity and its regional and global climatic teleconnections. The target readership includes advanced undergraduate and post-graduate students and researchers seeking to untangle the gamut of interactions that the Amazon's complex biophysical and social system represent.
